Challenge

AUT is committed to its sustainability agenda and sees ICT as a major opportunity for improvement. It aims to achieve an ICT sustainability best practice score of over 75% by 2024.

Solution

- Fujitsu conducted its sustainability benchmark for AUT in 2018 and 2021
- Key areas ICT analysed were enablement, metrics, lifecycle, end user and enterprise
- Short-, medium- and longer-term recommendations were made based on the findings

Outcomes

- AUT's 2018 ICT sustainability score of 55% increased to 71.3% in just three years
- This is more than double the 31.9% national score for the education, health and welfare sector
- By the next benchmark in 2024, AUT aims to exceed 75%
