FUJITSU

All the computing power you need, when you need it

Maximize application flexibility and business growth with Fujitsu uSCALE for Compute

In today's digital world, businesses depend on powerful IT infrastructure for data processing, big data analytics, and AI. To stay ahead of competitors, your infrastructure must be both powerful and adaptable. Fujitsu uSCALE bridges this gap, offering a cloud experience on-premises that is cost-efficient, flexible, and scales according to your demands.

By 2026, approximately 95% of businesses are expected to invest in fit-for-purpose compute technologies that deliver faster insights from data sets to drive their business results.[1] Uninterrupted, consistent computing power is non-negotiable for businesses to operate their critical applications. They seek a harmonious blend of performance and affordability, aiming to strike an optimal ROI. Fujitsu uSCALE for Compute brings cloud-like agility to on-premises data centers, combining the benefits of consumption-based as-a-service models while ensuring compliance and data security standards.

Fujitsu uSCALE for Compute

Fujitsu uSCALE for Compute presents "as-a-Service" solutions for on-site IT using our comprehensive service delivery capabilities, the power of the Fujitsu Ecosystem and PRIMERGY x86 servers. We provide performance, manageability, and scalability without traditional deployment costs or risk of over-provisioning. You get the capacity you need, when you need it, and pay only for the services you use.
