Top reasons to invest

Fujitsu Storage ETERNUS DX S6

Hybrid Storage Systems

Empowering your business continuity with Fujitsu Storage ETERNUS DX S6

Fujitsu Storage ETERNUS DX S6 is the perfect medium-sized and enterprise hybrid solution for your business growth.

The new generation DX S6 is designed to evolve with your needs. The very latest performance, powerful feature enhancements and automation capabilities contribute to your overall business efficiency, enabling highest availability and accessibility of your data, simplifying your storage system management and saving you valuable time. Experience seamless business continuity with our exceptional data protection technologies and comprehensive encryption.

Unlock the full capabilities of your data with the next generation Fujitsu Storage ETERNUS DX S6.

Highlights

Top performance and efficiency

Enhanced data availability, accessibility and management
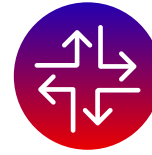

Sustainable and future-proof

Be ready for the future

Whether you're expanding your operations or dealing with fluctuating data volumes, the ETERNUS DX S6 is designed to adapt and deliver, making it a truly future-proof solution for your storage needs. The easy scale-up and scale-out options allowing you to adjust storage capacity as well as providing the necessary storage resources when you need them.

Focus on what matters

With ETERNUS DX S6 you no longer need to spend countless hours trying to navigate through complex data management systems. It features an easy-to-use graphical user interface allowing seamless navigation and operation, reducing the complexity of your data management and saving you valuable time and cost.

Non-Stop operation

ETERNUS DX S6 simplifies data replication and provides effective transparent failover among different ETERNUS storage systems, ensuring your data is always safe and accessible. It offers robust disaster recovery solutions and ensures your business operations run smoothly, without interruption.

Your data is safe

With ETERNUS DX S6 your data storage solution is secure, reliable, and environmentally conscious. It meets international compliance standards, adhering to the Restriction of Hazardous Substances (RoHS) directive. Also it complies with U.S. security regulations, providing robust data protection.
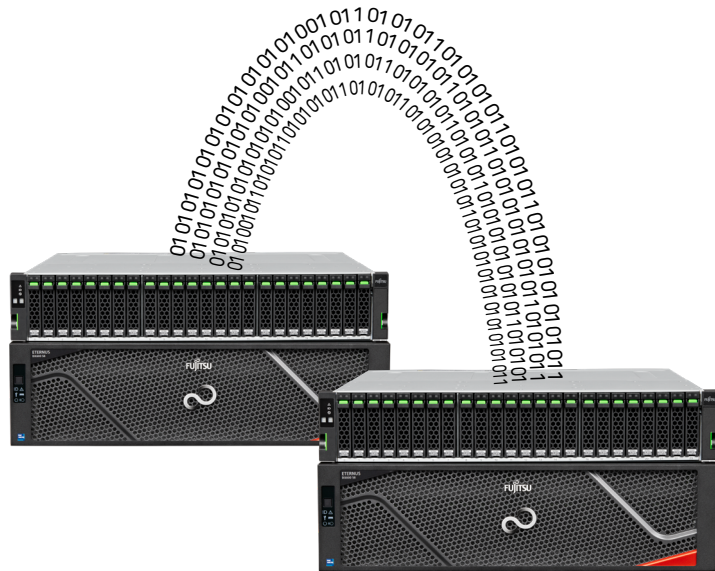

Intelligent data storage

ETERNUS DX S6 is offering new ways to enhance overall storage performance and efficiency. It automatically places your data across different storage types based on their performance and the value of your data. This results in optimized storage utilization. Get the most out of your storage investments.

Go green

The ETERNUS DX S6 eco-friendly design and advanced features optimize data storage efficiency and performance, reducing energy consumption and minimizing environmental impact. You can leverage the full power of your data while contributing to a sustainable future.

Highest availability and accessibility of your data provided by ETERNUS Active-Active Cluster.
