

Microsoft 365 Security Posture Assessment

- Get an informative, detailed report about your Microsoft 365 configuration
- Comparison to a secure baseline developed with Microsoft and the Compliance Frameworks
- Insights of your Microsoft 365 tenant security posture, vulnerabilities, risks, and opportunities for optimization within 2 weeks

Secure Microsoft 365 and maximize your investment

There's a reason why cyber security is now more important than ever. Our businesses depend on it. One simple misconfiguration can leave an organization vulnerable. And with thousands of security configuration settings in Microsoft 365, it can be difficult knowing where to start when you need to assess your security.

With our Microsoft 365 Security Posture Assessment you:

Know your configuration and set your security baseline within your Microsoft 365 environment

Secure your environment by understanding what's already deployed and what new products and services are available

Achieve and maintain your business-critical **compliance** requirements

Our offering

The Microsoft 365 Security Posture Assessment is a short-term consulting engagement which provides a view of your Microsoft 365 subscription security posture.

The assessment discovers the current state configuration of your Microsoft 365 environment, identifies security gaps and compliance concerns, and provides a high level plan on how to improve your security posture in Microsoft 365.

The quick assessment is delivered using oobe technology which has been developed specifically to help businesses understand, update, and maintain their Microsoft 365 environment to ensure compliance via assessment, remediation, and compliance monitoring.

Assess and Discover

Why Fujitsu?

Over 40-year-long global business relationship with Microsoft
